Hazardous combustion products: None.

5.3. ADVICE FOR FIREFIGHTERS:

When the product catches fire for the first time, use dry chemical, carbon dioxide, etc.

For big fires, it is effective to use extinguishing foam to cut off the air supply.

Firefighters must wear self-contained breathing apparatus pressure-demand and full protective gear (e.g., fire-proof suit).

The unnecessary personnel should be kept out of the area around the fire.

Move the container away from the conflagration area without danger, if possible.

Spray water to cool down surrounding facilities, etc.

When putting out a fire against the wind, extinguishing method should be suitable for the surrounding.

6. ACCIDENTAL RELEASE MEASURES

6.1. PERSONAL PRECAUTIONS, PROTECTIVE EQUIPMENT AND EMERGENCY PROCEDURES: Use suitable personal protection recommended in Section 8.

6.2. ENVIRONMENTAL PRECAUTIONS: Keep clean to discharge into urban sewers and open waters. Conform to local and national laws and regulations.

6.3. METHODS AND MATERIAL FOR CONTAINMENT AND CLEANING UP:

Small spill:

Wipe or absorb with desiccant material (e.g., cleaning cloth), and wash with water.

Large spill:

Isolate the contaminated area and set up a warning sign. Recommend the people who handle emergencies to wear protective suit. The material is nontoxic and harmless, but shall be kept away from heat and ignition sources.

Recommend collecting it with dry cloth or bucket. Cool down with fog of spray and dilute the steam. Dilute the spill until nonflammable. Protect staff. Use an explosion-proof pump to collect the spilt material into a proper container, which can be diluted with water.
